Summary

First-Class Computer Science graduate (De Montfort University). Since graduating I have built and launched my own products: Quire, a document reader and editor with a cloud collaboration feature (co-developed), and DrivePro, a carpooling web app for Almaty. Final-year project Intelli-Factory: a full-stack supplier-matching platform in Python/FastAPI, Next.js and PostgreSQL. Commercial experience: Python Telegram bots integrated with a CRM.

Technical Skills

Languages: Python, TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3/Sass; Java (academic); PHP (basic)
Frontend: React, Next.js, React Native/Expo, Tailwind CSS, jQuery; Vue 3 (basic)
Backend: FastAPI, Node.js, REST APIs, Pydantic/OpenAPI, Prisma ORM, Deno/Oak; WebSockets (basic)
Databases: PostgreSQL, MySQL, SQLite; exposure to MongoDB
Testing & DevOps: pytest, TDD, Playwright, Docker, Docker Compose, GitHub Actions CI/CD, Git, Linux
Cloud & Hosting: Oracle Cloud, Vercel, Render, Aiven, GitHub Pages
Algorithms: genetic algorithms (DEAP, NSGA-II), multi-objective optimisation; OCR (EasyOCR)

Experience

Software Developer, Telegram Bots & CRM Integration Feb. 2024 – Sep. 2024
Papa Gadget, mobile, PC and smart-device repair *Almaty, Kazakhstan*

- Built **two Python Telegram bots** in a two-person development team: a staff intake bot writing device records into the **RemOnline** CRM, and a customer promotion bot
- Moved device intake from paper into the bot, cutting manual data entry by **roughly 30%**
- Implemented staff login and a whitelist; wrote scripts against **REST APIs** and JSON; built an in-bot product catalogue

System Administrator Assistant (Internship) Sep. 2023 – Oct. 2023
Kazakhfilm, national film studio of Kazakhstan *Almaty, Kazakhstan*

- Account setup, troubleshooting, device connectivity and CCTV; incident records and equipment inventory

IT Support Intern (Internship) Jun. 2023 – Jul. 2023
Kaspi Bank, fintech ecosystem *Almaty, Kazakhstan*

- First-line software and hardware support for staff, documenting fixes

Projects

Quire, documents and cloud collaboration | *Tauri 2, React, TypeScript* 2026 – Present

- Live: app.thequire.app. Co-developed with my brother; web version and desktop installers
- Opens PDF, Office, EPUB/FB2/MOBI, images, audio, video and archives; PDF editor with form filling, compression and **true redaction**
- Cloud feature: rooms joined by key, real-time co-editing, private document sharing, audio/video calls, peer-to-peer mode; **Playwright** browser tests

DrivePro, carpooling in Almaty | *React Native, Node.js, SQLite* 2026 – Present

- Live: app.drivepro.dev. Built with Claude Code, 100+ commits
- Walking, cycling and driving routes with lifts matched to the driver's route; Expo web build on a dependency-free **Node.js** server
- **GitHub Actions CI/CD**: 45 smoke scripts gate every deploy

Intelli-Factory, final-year project (84%) | *FastAPI, Next.js, PostgreSQL* 2026

- Live: intelli-factory.duckdns.org | API: intelli-factory.duckdns.org/api/docs
- B2B platform for customers, factories and logistics providers: **FastAPI**, **Next.js 14**, **PostgreSQL** (Prisma), role-based access, **51 pytest tests**
- **Genetic algorithm (NSGA-II on DEAP)**: across 3,600 runs, **17.5%** better than a greedy baseline and **41.8%** faster delivery

---

Smaller projects

Terrain Raven, geospatial search prototype | *Python, pytest* 2026

- Matches a photo's mountain skyline against terrain data to find likely viewpoints; interactive map, tests and synthetic benchmarks. Private repository, code available on request

Websites and university projects

Drive Pro Website: company site, RU/KZ (Next.js) | igor-vuta.github.io/drivePro-website

Portfolio: Next.js 15, React 19 | igor-vuta.github.io/portfolio

Qubly: landing page from a Figma design (jQuery, Sass) | igor-vuta.github.io/qubly-landing

Photo to Table: moves data from photos into CSV/XLSX (Python, EasyOCR) | private repository, code on request

Student Course Hub (university): course catalogue (Deno, SQLite) | github.com/igor-vuta/student-course-hub

Module Chooser (university): JavaFX, MVC | github.com/igor-vuta/module-chooser-javafx

Education

De Montfort University Sep. 2022 – 2026
BSc (Hons) Computer Science, First-Class Honours, 76% *Leicester, UK*

- Final-year project Intelli-Factory (84%); software engineering, web development, databases, object-oriented design in Java. Kazakhstan campus 2022–2025, UK campus 2025–2026

Certifications

Meta Front-End Developer Professional Certificate, Coursera (ID 97UEVYXQM4UL) | Cybersecurity Foundation, Palo Alto Networks (code 9A5AD9bUXV) | Red Hat RH124 System Administration I (attendance)

Languages & Awards

Languages: English (fluent), Russian (native), Kazakh (conversational)
Awards: Bronze Medal, Republican Olympiad in four subjects (2021); Gold Medal, Chernorizets Hrabr International Mathematics Tournament
