EDUCATION

De Montfort University

2022 – 2026

BSc (Hons) Computer Science - First-Class Honours, final grade 76%

Almaty / Leicester

- Focus on software engineering and web development. Final Year Project, **Intelli-Factory**, awarded **83.2%**; object-oriented design and development assessed in **Java**.

TECHNICAL SKILLS

Languages: Python 3.12, TypeScript, JavaScript, SQL, Java (academic), PHP 8, HTML5/CSS3

Web & Mobile: FastAPI, React, Next.js, React Native/Expo, Node.js, REST APIs, WebSockets, Tailwind CSS

Data & Delivery: PostgreSQL, MySQL, SQLite, Prisma ORM, Docker, GitHub Actions CI, Vercel, Render

Engineering Practice: pytest, TDD, Git, code review, Agile, OWASP-aligned authentication, Claude Code (daily)

EXPERIENCE

Warehouse Operative

Dec. 2025 – Sep. 2026

Kovacs Group (agency), on site at DPD

Leicester, UK

- Maintained accuracy and throughput in high-volume parcel operations while completing a First-Class degree and final-year software project in parallel.

Software Developer - Telegram Bots & CRM Integration

Feb. 2024 – Sep. 2024

Papa Gadget - mobile, PC and smart-device repair

Almaty, Kazakhstan

- Built **two Python Telegram bots** integrated with the **RemOnline CRM**, including a staff intake tool with login and whitelist-based access control.
- Reduced repetitive manual data entry by **30%**, measured by timing device intake before and after rollout.
- Worked in a two-person development team, translating staff needs into maintainable **REST API** and JSON integrations used by 3–4 employees.

Earlier: IT support internships at **Kaspi Bank** and **Kazakhfilm** (2023), covering first-line support, JIRA tickets, troubleshooting and documentation.

RESEARCH

Intelli-Factory - Multi-Objective Supply Chain Matching

Feb. – May 2026

BSc Final Year Project, awarded 83.2%

De Montfort University

- Built and deployed a full-stack platform with **FastAPI, PostgreSQL/Prisma, Next.js and TypeScript**; implemented an NSGA-II-style genetic algorithm with DEAP and **51 automated pytest tests**.
- Benchmarked **3,600 evaluations**: **+17.5%** composite fitness over a greedy baseline, **41.8%** faster delivery and 100% feasibility. github.com/igor-vuta/intelli-factory

PROJECTS

DrivePro | React Native, Node.js, WebSockets, SQLite

2026 – Present

- Shipped four milestones of a ride-hailing app, from phone-verified accounts and live location streaming to driver matching and the full ride flow. github.com/igor-vuta/DrivePro_2

Stackroom | Python, Jinja, JavaScript

2026

- Built a server-rendered tool that turns a folder of documents into a public, searchable archive. github.com/igor-vuta/stackroom

ADDITIONAL

Languages: Russian (native), English (fluent), Kazakh (conversational) | **Certification:** Meta Front-End Developer Professional Certificate | Available immediately
